vacation

Dear Parents,

We will read the story "Titanic" this week and learn about researching topics for reports. Our next writing project will be a simple research paper.

We are studying the Solar System in Science and will learn about eclipses and the planets this week.

Your child will be reciting the answers to the multiplication flashcards this week. Many students mastered their addition flashcards and had begun working on subtraction cards. We will come back to them later in the year. As of now, it is extremely important that your child practice the multiplication flashcards at home every night. We will have a test over Chapters 9-12 in Math, Thursday. These chapters all covered multiplication. Students have several tricks to find the answers to the multiplication problems if they don't have them memorized yet. We will continue with the flashcards week after week until they are mastered.

Mrs. Jennifer Gigstad
