This short, but very busy, week at preschool had two very special people come to our classroom for two different, but very important reasons. Lori Oswalt, a local dental hygienist, came to help us start our Dental Health unit since it was Dental Health Week. She taught us all about how to have healthy teeth. Each child was given a new toothbrush and we all learned the right way to brush our teeth. We are also doing a Science experiment in our classroom with soda pop and pennies to see what happens to our very dark coins. Our school nurse, Kathy Albers, came to visit us this week so we could learn about having a healthy heart. We learned what to do each day to keep our heart healthy and what foods we should eat for a healthy heart.

In our Animated Literacy we met Hippy Hippo. In Math we learned the number 16. We are continuing to count to one-hundred and did some different activities with opposites and rhyming.

The afternoon Tiger Paws class made their monthly trip to the public Library to hear some very good stories, all about the month of February.

Keep warm and remember spring is only a month away!!!!
