

USD #377 Atchison County Community Schools News Release

Effingham, KS 66023
(913) 833-5050

FOR IMMEDIATE RELEASE

As part of the Life Science curriculum at ACCMS, 5th and 6th grade students in Joyce Thompson's science class experience a hands-on lesson in body systems. The 5th grade activity was to dissect preserved worms. 6th grade students dissected preserved frogs. Both groups of students learned about the external and internal anatomy of their worm or frog. Pictured below are 5th graders Stephanie Martin and Kiley Warriner trying to correctly identify the internal organs of a worm. Also, 6th graders Samantha Noll and Russell Eckert check out the chest cavity of a frog.
