Hannah Boos, Alden Wheeler, Jordan Miller, Dalton Atzenweiler, and hiding behind Alden is Tobin Warriner

Freshmen General Science students traveled to the University of Kansas to participate in KU Engineering Day activities. ACCHS freshmen competed against students from over 40 schools from across the region and toured the Engineering department. They were able to meet several professors and engineering students and had a great time walking the hills on campus. Students had a great learning experience and were able to put the concepts they have been learning in the classroom to work.
