New Playground Equipment Installed at Cummings Elementary

A new climbing wall, called RockBlocks, has been purchased by the Cummings PTO and installed by L & L Construction for Cummings Elementary School. This piece of equipment was the goal of last spring's fundraiser. The parents and students earned enough to fund this new equipment. The students and staff thank all of our patrons who support these efforts, the Cummings PTO who continually strives to provide us with those "extras" that make it fun, and L & L Construction who donated a crew and their time and effort as well as supplies to install the equipment. The Board of Education accepted the gift of equipment at the November 13, 2006 Board Meeting.
